PROJECT EXPERIENCE

1. V - Care (Vehicle Management System Mobile Application - Group)

This application is used to manage and maintain vehicles. The main features of this application are selling spare parts, finding the nearest garage shops, and maintaining vehicle service records.

Used Technologies:

Flutter, Node JS, Express JS, MongoDB

2. ITUM Guard Room Management System (Web Application - Group)

This web application was created to manage our university security system. Security officers can manage all the in and out person details on the university premises.

Used Technologies:

React JS, Node JS, Express JS, MongoDB

3. Student Management System Backend (Individual)

This backend server is developed to manage CRUD operations in the student management system. Postman API testing tool is used to test all CRUD operations.

Used Technologies:

Node JS, Express JS, MongoDB, Postman testing tool

4. Portfolio Website (Individual)

This is my personal portfolio website, which I created to represent my technical skills. I used only basic web development technologies because it help me to understand fundamental web development concepts. I also used GitHub pages to host the website.

Used Technologies:

HTML, CSS, JavaScript, Github pages
